

Streamline Your Data, Boost Accuracy, and Maximize Efficiency with DataVantage Adviser®

DataVantage Adviser® empowers organizations to seamlessly migrate data between platforms, while maintaining integrity and minimizing downtime. Whether transitioning mainframe data to the cloud, on-premise, or distributed systems, DataVantage supports the extraction and transformation of data to ensure smooth migrations.

Using DataVantage Adviser, organizations can efficiently manage, edit, and visualize Rocket Software Visual COBOL (formerly Micro Focus COBOL) files, NTT Data COBOL files, and relational databases. Tailored for modern distributed environments, Adviser offers the precision, simplicity, and advanced features you need to streamline data processes, minimize errors, and maximize productivity.

Powerful Filtering Options

Utilize an intuitive wizard to create precise filter selections and search in character or HEX format.

Flexible Editing Tools

Edit records individually or in batches, with support for ASCII and EBCDIC character sets.

Relational Database Support

Benefit from optional drivers that enable enhanced database compatibility, offering expanded functionality for users.

Broad System Support

Achieve compatibility with relational databases, NTT Data COBOL files, and Rocket Software COBOL files, ensuring flexibility in handling data across platforms.

Enterprise Security

Integrate with Active Directory or LDAP to enforce secure access controls across your organization.

Advanced Visualization Tools

Experience data in familiar formats to efficiently work with her with data.

Accomplish More With Less Using DataVantage Adviser

With DataVantage Adviser, you can accomplish more with fewer resources. Its affordable pricing model provides premium functionality without the premium cost. Whether managing on-premise or cloud-based data, Adviser simplifies data tasks with its intuitive tools and advanced capabilities. Here's how Adviser works for you:

- **Enhanced Efficiency**

Streamline workflows with a user-friendly interface that simplifies even the most complex data management tasks.

- **Versatile Compatibility**

Access and manage data seamlessly across distributed systems and cloud environments.

- **Improved Accuracy**

Edit directly within data files to reduce errors and improve precision.

- **Cost-Effective Data Security**

Maintain tight control of production and test environments without needing separate setups, saving both time and expenses.

“DataVantage Adviser’s ability to create secure subsets of production data without needing a separate environment is a huge benefit in terms of efficiency. In a critical production environment, downtime can have significant financial and operational consequences. DataVantage’s ability quickly fix or restore production systems is crucial for minimizing any disruptions.”

—MICHAEL M., LINUX SYSTEM ADMINISTRATOR, U.S. STATE

Why Choose DataVantage Adviser?

DataVantage Adviser sets the benchmark for data accessibility and editing. Trusted by enterprise organizations, the solution combines innovative visualization and editing tools with unmatched simplicity, making it the ideal choice for data-driven businesses. Backed by expert support, you can trust Adviser to optimize your workflows and protect your data.

See for Yourself
